

Install python and python packages

```
sudo apt install python3 python3-pip python3-tk
```

Install graphical user interface :

Install VcXsrv

Setup

Launch VcX via the XLaunch command (windows start menu)

1. multiple windows, display number **0**
2. Start client
3. "Disable access control" : yes.

Export in .zshrc :

```
export DISPLAY=$(awk '/nameserver / {print $2; exit}' /etc/resolv.conf 2>/dev/null):0
```

Test

```
python3
>> import turtle
>> bob = turtle.Turtle()
```

Should start a window.
